

CONCIERGE COVID CARE IN-HOME EVALUATION & COVID-19 TEST

Irene Nobles, RN, MSN
Cornerstone LifeCare
Consultant

A special offer within our CONCIERGE COVID CARE is to provide **IN-HOME COVID-19 TESTS** facilitated by a Cornerstone LifeCare Clinician. During these unsettling times we are focusing on providing the convenience of vital virus-related services — right where you live. Consider the advantages of not having to travel and then wait at a COVID-19 testing location. You will receive the results of your COVID-19 TEST confidentially via your personal email. You will then be given the opportunity to discuss with Irene a course of action and develop follow-up steps.

CALL 941-809-7298 TO SCHEDULE A CONSULTATION!

“GOLD STANDARD” IN-HOME COVID-19 TEST

A PCR test for COVID-19 is a test used to diagnose people who are currently infected with SARS-CoV-2, which is the coronavirus that causes COVID-19. The PCR test is the “gold standard” test for diagnosing COVID-19 because it’s the most accurate and reliable test.

Sample collection is done using a swab to collect respiratory material found in your nose. After collection, the swab is sealed in a tube and then sent to a laboratory.

When a laboratory technologist receives the sample, they perform a process called extraction, which isolates genetic material from the sample including genetic material from any virus that may be present.

PHYSICIANS STAT LAB is a Cornerstone LifeCare Partner and responsible for the laboratory processing and reporting. Results typically are available within 24 to 48 hours. Go to www.physiciansstatlabinc.com.

COVID-19 TEST POSITIVE OR NEGATIVE — STRATEGIES AND STEPS

POSITIVE TEST
