

## An In-Person Seminar **REVERSAL, TREATMENT, AND PREVENTION OF COGNITIVE DECLINE**

**FRIDAY, DECEMBER 3, 2021  
2:30 PM - 3:30 PM**

### **COGNITIVE HEALTH CENTERS**

We are **the** Dr. Dale Bredesen Clinic

#### **ALZHEIMER'S DISEASE AND COGNITIVE DECLINE ARE TREATABLE!**

Join us for this on-site seminar to learn more about an innovative approach to Brain Health and Cognitive Decline. Hear Dr. Niels share about programs related to the new clinic in Sarasota — Cognitive Health Centers (CHC).

They are the first primary care clinic that focuses solely on maintaining and improving brain health. Using Dr. Bredesen's protocols for the reversal, treatment, and prevention of cognitive decline, CHC provides patients, caregivers, and families with a comprehensive approach to care.

They focus on cognitive decline, and, unlike other clinical specialties, treat the whole person with primary and integrative, evidence-based care. Their clinic completes a thorough assessment and works with each patient, their family, and caregivers to develop a personalized care plan to address their total health, current cognitive status, and unique pathologies.

#### **PRESENTER**
