HOMECOMING TECHNOLOGIES

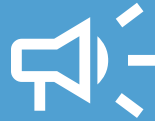

Care with Connection

Homecoming:

A mobile app providing real time event notifications, geolocated care spaces, adaptive to changing senior care conditions.

Our mission:

To enhance and extend quality living for independent seniors and their caregivers.

HOMECOMING TECHNOLOGIES

Care with Connection

Senior Care Partner

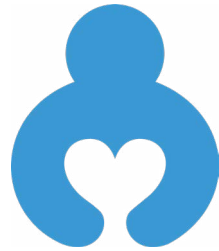

- empowered to stay active with confidence
- enables greater autonomy and independence
- extends independent living

Care Partner

- increases real time awareness for care and proactive decision making
- lessens hypervigilance of caregiving
- customizable for changing care profiles
- medical equipment monitoring

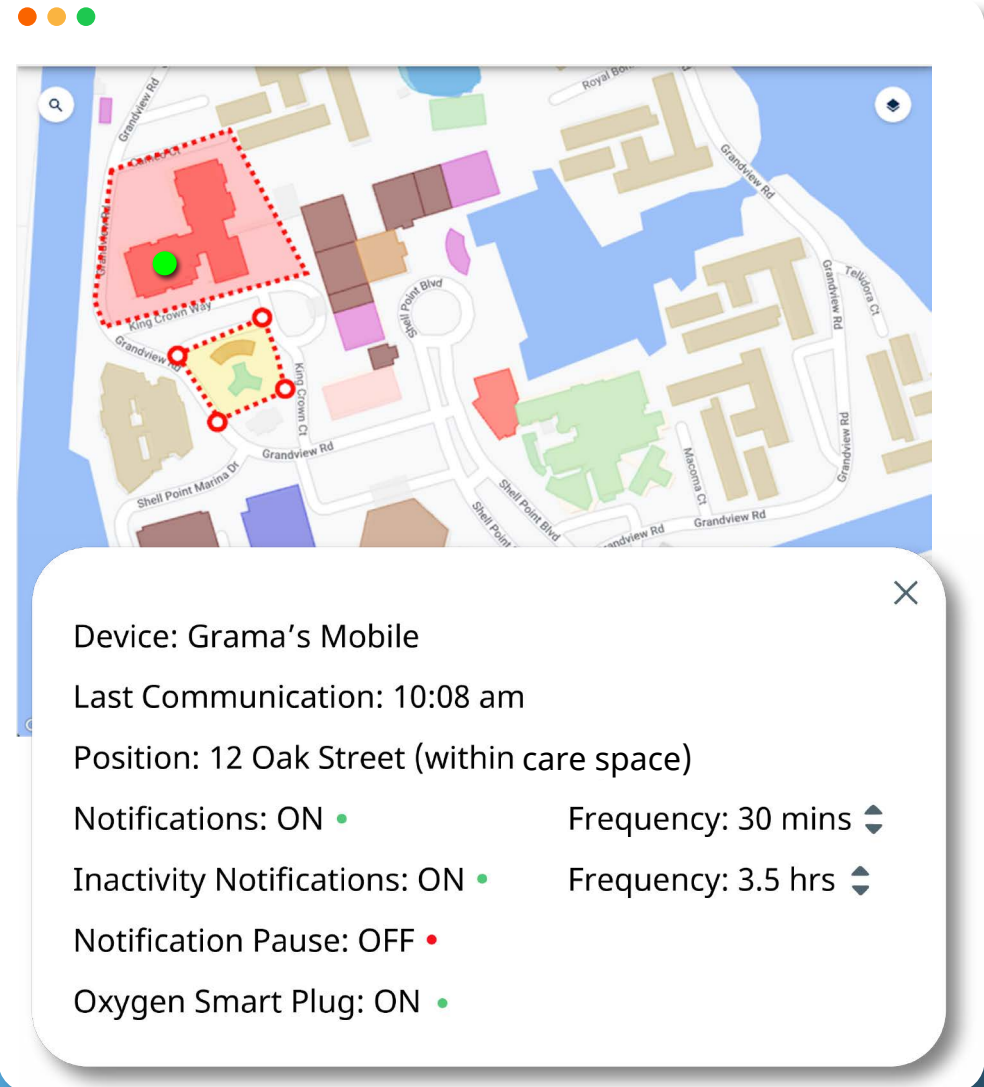

Senior Care Partner Phone

Homecoming Technologies

Care with Connection

Caregiver Dashboard

One App, Two Users – One Connection

HOW HOMECOMING WORKS

- Mobile app
- Portal subscription connects caregiver and senior care partner
- Secure and seamless connection between all parties / critical electrical devices

Example Notifications

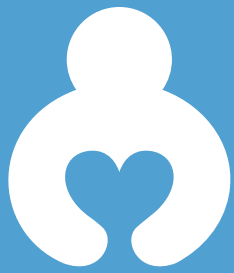

- Dad out of care space
- Mom's phone battery @ 10%
- Uncle's phone indicates a fall
- Wife's O² machine indicates power loss
- Husband has been inactive for 3.5 hours

Smart Phone • Smart Watch • Bluetooth Beacon • Apple AirTag • Tile Tracker • Smart Plug

HOMECOMING APP ADDITIONAL USES

Nursing Care Accountability:

Seniors living in nursing homes can use the Homecoming App to confirm proper care and fall events remotely. Example: Care partner can place a digital care space around a nursing home facility to confirm senior is taken out each day for sunshine and fresh air. Homecoming App will indicate a fall which should be confirmed by Nursing facility.

Campus Safety Corridors:

Students can create safety corridors using the Homecoming App to move around campus with confidence. Example: A young female student can create a safety corridor between the library and her dormitory for confident night travel. Should her phone stray from the corridor, campus security would immediately be notified and can track the location of the phone. The student then turns off the app at the dormitory.

Parental Oversight:

Parents can reduce the hypervigilance of caring for autistic and at risk children with the Homecoming App. Example: Parents can create a digital save space outside for a play area, and be notified if their child strays from this space.
